

## Project Design Phase-II

### Technology Stack (Architecture & Stack)

Date	15 October 2022
Team ID	PNT2022TMID46404
Project Name	Smart Farmer – IOT Enabled Smart Farming Application
Maximum Marks	4 Marks

#### Technical Architecture:

The Deliverable shall include the architectural diagram as below and the information as per the table1 & table

**Table-1: Components & Technologies:**

<b>S.No</b>	<b>Component</b>	<b>Description</b>	<b>Technology</b>
1.	User Interface	Mobile app. In our application where data are displayed using widgets like structure. Users interacts with widgets to additional information	MIT App Inventor
2.	Application Logic-1	Logic for a process in the application	Python
3.	Application Logic-2	Logic for a process in the application	IBM Watson STT service
4.	Application Logic-3	Logic for a process in the application	IBM Watson Assistant
5.	Database	Data base type	Firebase is NoSQL database
6.	Cloud Database	Database Service on Cloud	Firebase, IBM Watson IOT Cloud Platform
7.	File Storage	File storage requirements	IBM Block Storage or Other Storage Service or Local File system
8.	External API 1	Purpose of the API is get to weather information	Open Weather API
9.	External API 2	Purpose of the API is to connect with firebase for login purpose	Firebase API

10.	External API 3	Purpose of the API is to send an SMS to mobile devices.	Fast2SMS API
11.	Infrastructure (Server / Cloud)	Application Deployment on Local System / Cloud Local Server Configuration: Cloud Server Configuration:	Local, IBM Cloud, Firebase
12.	DHT11 sensor, Soil Moisture sensor	It used to monitor the soil, temperature, humidity.	IBM Watson IOT Cloud Platform

**Table-2: Application Characteristics:**

S.No	Characteristics	Description	Technology
1	Open-Source Frameworks	Node Red, MIT App Inventor, Arduino IDE Node Red for connecting with application, MIT App Inventor for building app, Arduino is open-source electronics platform to build hardware and software.	It is a software, which helps in connecting and building application. Node Red, MIT App Inventor, Arduino IDE.
2	Security Implementations	HTTPS Connections, X-Force Red IOT Testing	Encryptions, Secured Connection
3	Scalable Architecture	Architecture is scalable from 10 devices to 300 devices easily and account is also scalable up to thousand connections. For very high scalability we need to upgrade our cloud plan.	Firebase, IBM Cloud
4	Availability	Availability of our application is 24/7 because which use a cloud technology. Firebase will use commercially reasonable efforts to make Firebase available with a Monthly Uptime Percentage of at least 99.95% and distributed servers.	Firebase, IBM Cloud

5	Performance	No of requests is 2 requests per 20 seconds or 4 requests per 30 second and sometimes user request will be added with respective to the requests	MIT App Inventor, Node Red, Cloud
---	-------------	--	-----------------------------------
